

## RECENT LITERATURE

Compiled by M. S. Moulds

This section attempts to fulfil the need for a comprehensive list of current Australian entomological literature. It is arranged so that the listings may be used to compile personal bibliographies concerning specialised interests. It dates back to the beginning of 1972.

**If you have published anything concerning Australian insects since the beginning of 1972 and it is not listed in this, or previous issues of Aust. ent. Mag., I would be grateful if you would advise me accordingly so that such literature can be listed in the next issue.**
